

AERO BLUE*

Performance Surgical Gown

SOFT TO THE TOUCH PROTECTIVE TO THE CORE

The new **AERO BLUE* Performance Surgical Gown** is lighter, more breathable, amazingly soft¹ with four times more fluid protection in the critical zones than other gowns in its class.² To understand how that's possible, you have to delve down to its core. AERO BLUE*'s innovative fabric features our proprietary Cool Shield Core technology that lets moisture vapour pass through without fluid penetration.³ It also builds in softness and elasticity for freedom of movement without tearing.

The result: AERO BLUE* delivers the highest protection available⁴ in an AAMI level 3 gown – plus unsurpassed comfort.⁵

UNSURPASSED PROTECTION AND COMFORT

- The only AAMI3 gown fabric with a **protective core**³
- **2 times more protective** than conventional reinforced gowns²
- **The lightest weight** for single-use AAMI3 gowns¹
- **Excellent resistance to abrasion**⁶
- **Highest rating against ignition**⁷ from surgical lasers and other heat sources

Explore the Cool Shield Core

AERO BLUE's proprietary copolymer core allows moisture vapour to escape for cool comfort but prevents fluid penetration – even under extreme high-pressure testing.⁸

Green neckband indicates high fluid protection

Comfortable, flexible fit gives wearers complete range of motion

Innovative Core for superior protection in a softer, lighter gown¹

Highly breathable back panel maximises air flow for cool comfort⁹

Highly resistant to linting, abrasion and flame.^{6,7,10}

CORE BENEFITS

- Innovative Cool Shield Core technology makes AERO BLUE* Performance gowns more protective, softer, thinner and lighter
- 4 times more protective² than leading non-reinforced surgical gowns
- Unsurpassed comfort¹ thanks to its soft fabric with breathable core
- Your core gown – so versatile you can consolidate SKUs, simplify inventory management, and reduce your cost-in-use

Highly breathable back panel maximises air flow for cool comfort⁹

1. As measured by basis weight of fabric, MOCON study, cup crush method and comfort panel study. Verification Test Report, GL-DSR-00474. Data on file, Halyard Health.
2. Per Hydrohead test method.
3. As measured by MOCON and Hydrohead test methods.
4. As measured by Hydrohead, ASTM1670 Synthetic Blood Penetration tests.
5. Per Comfort Panel study.
6. Per Martindale Abrasion test.
7. Per ISO 11810.
8. Per ASTM 1670 test method.
9. Per Air Permeability test.
10. As measured by Gelbo Lint test.
