LET US CHANGE YOUR VIEW

96% of physicians had greater confidence in detecting and tracking ocular and systemic disease with a digital ophthalmoscope versus traditional.¹

Always read the label and instructions for use.

WELCH ALLYN PANOPTIC® OPHTHALMOSCOPES

- Long, lasting LED illumination
- 20X larger view vs. standard ophthalmoscopes
- Familiar focus wheels and standard apertures included

The comparison shows two circular views of a retina. The left circle is small and labeled 'Standard Ophthalmoscope'. The right circle is significantly larger and labeled 'PanOptic Ophthalmoscope'. Between them, the text '20X LARGER VIEWING AREA' is displayed.

Standard Ophthalmoscope

20X

LARGER VIEWING AREA

PanOptic Ophthalmoscope

TAKE A CLOSER LOOK AT THE VALUE PANOPTIC PLUS ADDS

- 1** Switch from an optical exam to digital when you pair our iExaminer Smartbracket, iExaminer Pro App and your smart device.
- 2** Eye alignment technology helps you direct a patient's gaze for better entry into the eye.
- 3** Both PanOptic heads are optimised for use with the new Lithium-Ion Plus Power Handle, staying bright over the life of a battery charge with no colour change when dimmed, unlike with halogen lamps.

Welch Allyn® MacroView® Otosopes

EXPAND YOUR VIEW

Experience bigger, brighter views with our Welch Allyn MacroView and MacroView Plus Otoscopes. Enhance exams with the MacroView Plus Otoscope, and the option to capture and share ear images for consultation. Both devices work on existing Welch Allyn 3.5 V power sources.

Pair the MacroView otoscope with Welch Allyn LumiView™ Clear Single-Use Ear Specula for brighter views.

Save and share ear images with the MacroView Plus device when combined with our iExaminer® SmartBracket™ and iExaminer Pro App.

¹ 60+ years typical. Assumes an average of 10 patient exams (both ears) per day taking 15 seconds per ear for 200 days per year.

Intended Use Welch Allyn® MacroView™ Plus Otoscope:

The Welch Allyn MacroView and LED otoscopes are intended to be used by clinicians and medically qualified personnel for examination of the external ear, ear canal, and tympanic membrane under illumination and magnification on pediatric and adult patients. The otoscope is also intended to assess the flexibility of the tympanic membrane through air pressure and for general illumination of the oral and nasal cavities. The intended use environments for the Welch Allyn MacroView and LED otoscopes are professional healthcare facility environments such as general physician's offices, hospitals, specialists, urgent care, clinics, and clinical environment training. Contraindications: The Welch Allyn MacroView and LED otoscopes are not intended to be used to examine the eye. **WARNING** Patient injury risk. Do not use otoscope without attaching a specula tip as this can cause ear injury or cross-contamination. **WARNING** Cross-contamination risk. Do not reuse disposable specula tips as this may spread contamination from one patient to another patient.

Intended Use Welch Allyn® iExaminer™ Pro App:

The iExaminer application with the appropriate Welch Allyn devices is intended to be used by clinicians and medically qualified personnel to capture and send images on pediatric and adult patients. The iExaminer System with MacroView Plus is intended to be used by clinicians and medically qualified personnel to capture and send images of the external ear, ear canal, and tympanic membrane on pediatric and adult patients. The intended use environments for the iExaminer application and iExaminer System with MacroView Plus are professional healthcare facility environments such as general physician's offices, hospitals, specialist, urgent care, clinics, and clinical environment training. Use the smartphone only in environments consistent with the manufacturer's recommendations. There are no contraindications for the iExaminer app. See the appropriate Welch Allyn device IFU. The iExaminer System with MacroView Plus is not intended to be used to examine the eye. **WARNING:** Patient injury risk – magnetic fields. Exercise caution when using a smartphone in close proximity to implanted devices such as, but not limited to, cranial implants, adjustable CSF shunts, and pacemakers.
