PREMIER NITROSPRAY PLUS CRYOSURGICAL UNIT

Premier Nitrospray Plus Cryosurgical Unit constructed of a double-walled vacuum stainless steel container (canister) to hold liquid nitrogen. The outflow track extension port, located on the top of the instrument has a luer-lock connector to easily engage/disengage spray tips and other attachments as required.

Intended Use

To provide a means of transporting liquid nitrogen to the patient and to dispense the liquid nitrogen as a cold gas in a controlled manner during general and dermal cryosurgical procedures. The gaseous nitrogen, when dispensed is at a temperature of -196°C.

Indicated for treatment of: Benign and premalignant lesions and some selected malignant lesions

Warranty:

Nitrospray Unit warranted for three (3) years from date of purchase against defects in workmanship or parts. Warranty is void if the unit is subjected to improper use or damage and unauthorised repairs.

Package Inclusions: Flask (300 or 475ml), Set of 5 spray tips and spray tip protector
